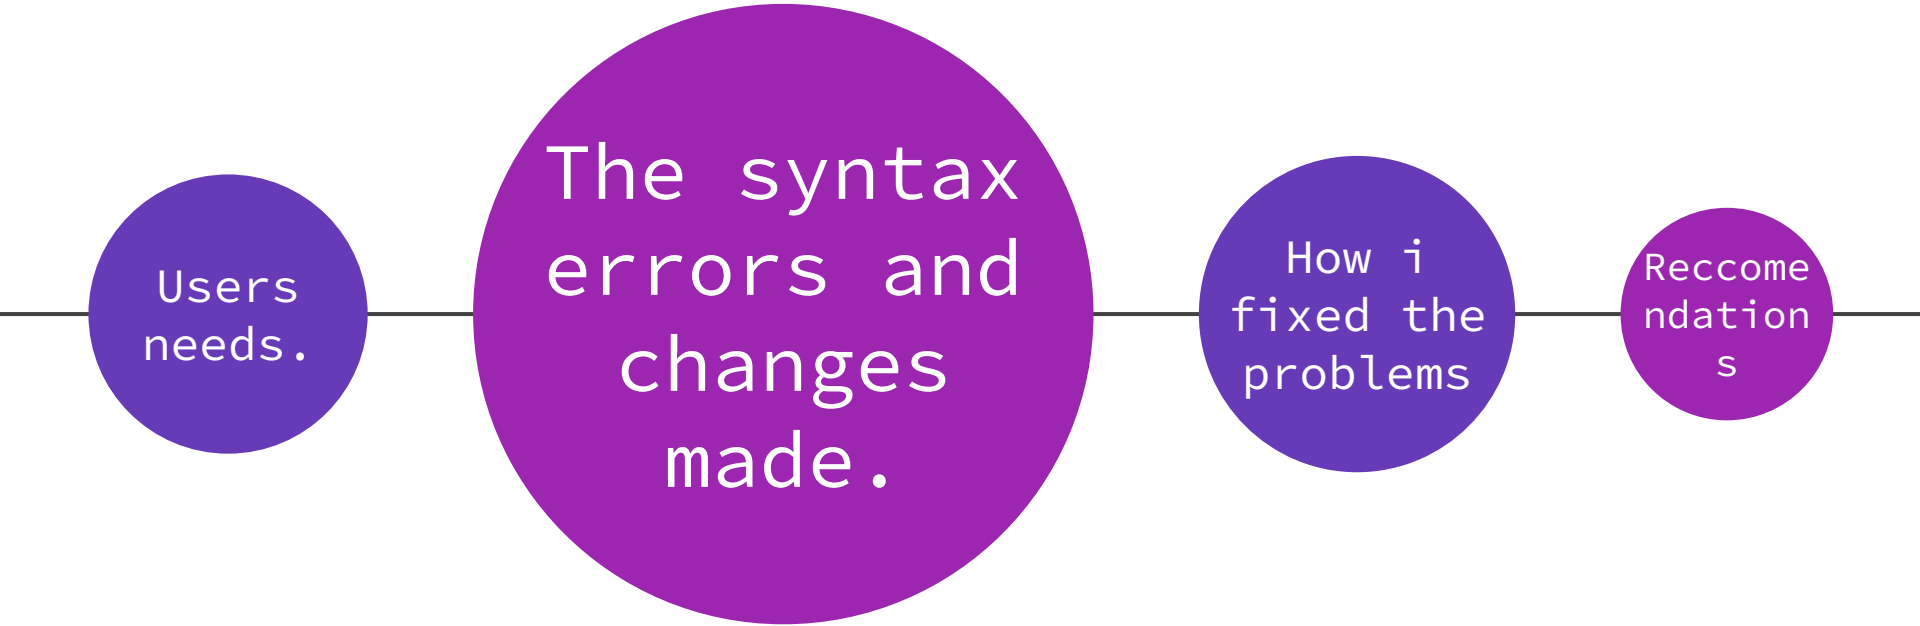
Olebogeng Rasebitse

IWA19 Book Connect App

About the challenge

For this challenge we were tasked to finish a code built by another developer. The code contained numerous syntax errors. The purpose of the code is to display a collection of books, along with their respective titles and summaries.



Users needs.
The syntax errors and changes made.
How i fixed the problems
Reccomendations

What the user wants:

- Display list of book previews by title and author.
- Include images for book previews.
- Allow user to read summaries of books.
- Show publication date .
- Allow search based on specific text phrases.
- Provide dark and light mode.
- Filtre books by genre and author.

Changes made to the code:

- HTML
- Data.js
- Script.js

script .js

- Theme button.
- Search button.
- Show more button.
- Display books with details.
- Preview books with the name, summary, date and image.

Recommendations:

- Keep it simple
- Keep it up to date
- Prioritize perfomance

Thank you!
